

ANNABEL TU

annabeltu9@gmail.com | (919)-671-9428 | www.linkedin.com/in/annabel-tu | annabeltu.github.io/AnnabelWebsite/

An adaptable computer and data science student with a mathematical foundation, fueled by a passion for entrepreneurship and artificial intelligence, seeking to leverage these talents to cultivate expertise in the field of software engineering.

EDUCATION:

University of North Carolina at Chapel Hill

Expected Graduation: May 2027

B.S. Computer Science and B.A. Data Science | Minor: Entrepreneurship

Clubs: Upsilon Pi Epsilon (Computer Science and Information Science Honor Society), Women in Computer Science, UNC Undergraduate Business-Technology Club, Leaders in Entrepreneurship, Delight Ministries

TECHNICAL SKILLS:

Programming Languages: Java/Java Script, Python, HTML/CSS

Certifications: Microsoft Azure AI Fundamentals, Extron Control Principles

Technologies: AWS, React, Figma, Git, Docker, Visual Studio Code, Jira

EXPERIENCE:

UNC Hussman Journalism | *Computer Support Analyst* | Chapel Hill, NC

August 2023 - Present

- Assist over 100 staff members in over 20 classrooms with classroom technology support, new computer set up, and Mac and PC troubleshooting
- Translate complex IT issues into accessible solutions, enhancing support among faculty and staff with diverse technical expertise
- Streamline IT operations by editing and creating comprehensive documentation

Live Oak Bank | *AI & Automation: Software Engineer Intern* | Wilmington, NC

May 2025 - July 2025

- Developed and deployed 3 chatbots using JavaScript and AWS to streamline internal operations and enhance customer experience, including tools for policy retrieval, website navigation, and internal AI guidance, reducing manual search time and increasing workflow
- Built a prototype core banking system using JavaScript and AWS to manage accounts, transactions, and transfers, laying the foundation for scalable financial infrastructure
- Researched and experimented new technologies to provide innovative solutions to technical challenges

J.P. Morgan Chase | *Lead Data Analyst: Data For Good Participant* | Plano, TX

April 2025

- Participated in a hackathon by creating a platform for the National Basketball Players Association (NBPA) that demonstrating players' performance with the incorporation of an AI chatbot using React
- Cleaned and analyzed data using Python, Pandas, NumPy
- Created compelling data visualizations using Python, Pandas, NumPy, Scikit-learn, Matplotlib

Capital One | *Software Engineer Summiteer* | Remote

July 2024 - August 2024

- Won a hackathon themed "Fintech Future" by creating a mobile app that promotes financial responsibility and awareness of emotional spending using React Native, REST API, MongoDB, and Figma
- Developed a full-stack movie library application using React, APIs, and Git
- Gained hardware integration experience by applying JavaScript to an Arduino project

Live Oak Bank | *A/V Intern* | Wilmington, NC

May 2024 - July 2024

- Provided comprehensive support for conference room technology across 5 buildings, assisting about 1,000 employees with iPads, Cisco Room Navigators, Cisco Room Boards, and Cisco Room Bars
- Accompanied software engineers to code and develop macros to improve the Cisco room experience
- Gained expertise in networking, including VLANs, cable management, and Cisco ThousandEyes
- Integrated Rich Maps onto Cisco Room Boards through Cisco Spaces and Webex Control Hub

AWARDS:

Live Oak Bank: The Hardest Worker Award - June 2024

WRAL-TV Extra Effort Award - May 2023
